

Mission Cloud's Instant Discount Program

Guaranteed savings, no commitments

Get Up to 5% Off Your Entire AWS Bill

With the Mission Cloud Instant Discount Program (IDP), you can get 5% off your monthly AWS with no long-term commitment. You also get Mission Cloud Foundation, our service cost optimization, governance, and foundational best practices with AWS.

Why IDP?

GUARANTEED PREDICTABLE SAVINGS

We'll give you an immediate, across-the-board 5% discount on your AWS usage, as soon as you're onboarded.

NO MINIMUM OR LONG-TERM COMMITMENTS

Many private pricing programs require prepayments or revenue commitments, long-term contracts or growth clauses. While this can make sense for larger-scale purchasing agreements with AWS, we built this service to be no-strings-attached.

INDUSTRY-LEADING TOOLS

We leverage our cloud services platform, Mission Control, to score your best practices alignment and identify cost-savings opportunities on a per resource basis. And in addition, we give you CloudHealth for forecasting, cost monitoring, analysis of historic usage.

A TEAM OF CLOUD ANALYSTS

As part of Mission Cloud Foundation, you'll get access to a team of Cloud Analysts who help you to continuously identify strategic cost opportunities, increase your visibility into usage, identify and eliminate wasteful spending, and plan for the future.

Frequently Asked Questions

How long do I get the discount?

→ Your discount is guaranteed for 12 months, with the option to renew thereafter.

What are the requirements to get started with IDP?

→ To get started, you must sign up for Mission Cloud Foundation.

Can I continue to use Reserved Instances and Savings Plans under IDP?

→ Yes, you can continue to use RIs and SPs with IDP—in fact, our team of Cloud Analysts analyzes your environment in order to identify even more savings opportunities with these and will seek to maximize your coverage.

Mission Cloud is a next-generation cloud services provider, combining managed and professional services. We help businesses migrate, manage, modernize and optimize their AWS environments at every stage of their cloud journey.
